

WIKWEMOT AR

VIDEO GAME IN AUGMENTED REALITY

ACTIVITY DESCRIPTION

In the form of an augmented reality (AR) video game available on phones and tablets, the Wikwemot activity presents how to skin a moose leg in a fun, interactive way. The game also explores everything you can do with the different parts of the leg: rattle, nabwan, sinew threads for sewing, tools for tanning the hide, a bag made from the hide, etc. Divided into different chapters, the video game allows the user to move from a complete moose paw to several practical craft items.

STEPS TO PLAY THE VIDEO GAME

- ① Have a phone or tablet with a fully charged battery.
- ② Scan the QR code / or search for WIKWEMOT AR on Apple Store or Google Play / or go to minwashin.org.
- ③ Download the application.
- ④ Place the QR Code/anchor on a flat surface, such as a table.
- ⑤ Open the application.
- ⑥ Select language.
- ⑦ Start with level 1: Bone leg.
- ⑧ With Grace's advice, complete the 6 levels of the video game.
- ⑨ Apply what you've learned to real moose legs!
